DATE MAILED: 12/02/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/782,273

Applicant(s)

GRILLIOT ET AL.

Examiner

Alissa L. Hoey

Art Unit

3765

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 August 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-5, 7-13, 15 and 16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5, 7-13, 15 and 16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Response to Amendment

1. This is in response to amendment received on 08/27/05. Claims 1, 3-5, 9, 11-13 and 16 have been amended. Claims 1-5, 7-13 and 16 are examined below.

Terminal Disclaimer

2. The terminal disclaimer filed on 08/27/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Patent # 6,892,394 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-5, 7-13, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aldridge (US 5,933,865).

In regard to claim 1, Aldridge provides a protective garment (10) for protecting a military or paramilitary firefighter or emergency worker (column 1, lines 32-64). The protective garment of Aldridge is a coat (10). The protective garment (10) is capable of being reversible and has a shell of high visibility (16) and a shell of low visibility (inside of 14) depending upon what color the reverse is and what situation you are in. The garment (10) is wearable with either shell facing outwardly while the other shell faces

inward. The shell of high visibility has portions of reflective material (30) that faces outwardly when the protective garment is worn so that the shell of high visibility faces outwardly and the shell of .

The garment of Aldridge is capable of being worn in a tactical situation wherein a need for low visibility overrides a need for high visibility develops or is expected to develop. The military or paramilitary firefighter or emergency worker wearing the protective garment with the shell of high visibility facing outwardly and the shell of low visibility facing inwards is capable of being motivated to doff the protective garment, to reverse the protective garment, and to re-don the protective garment with the shell of low visibility facing outwardly and the shell of high visibility facing inwardly.

In regard to claim 2, Aldridge teaches portions are provided by reflective trim affixed to the shell of high visibility (30).

In regard to claims 3 and 10, Aldridge teaches a garment for protecting a firefighter as described above in this office action (see claim 1). The garment of Aldridge is capable of being used in the method of claims 3 and 10, since the structural limitations of the garment used in the method are provided by Aldridge and therefore it is capable of being used in the method as described.

However, with regard to the shell of low visibility appearing dark in ambient light, Aldridge teaches a liner that is capable of being worn as the outside surface and the appearance of the shell depends upon the degree of ambient light provided. Any color can appear dark when the lighting is low and only silhouettes are visible. Therefore, the

inside of the liner worn as the outside surface is capable of appearing dark when in ambient light.

In regard to claims 4 and 12, Aldridge teaches a garment for protecting a firefighter as described above in this office action (see claim 1). The garment of Aldridge is capable of being used in the method of claims 4 and 12, since the structural limitations of the garment used in the method are provided by Aldridge and therefore it is capable of being used in the method as described.

However, with regard to the shell of low visibility appearing dark in ambient light, Aldridge teaches a liner that is capable of being worn as the outside surface and the appearance of the shell depends upon the degree of ambient light provided. Any color can appear black when the lighting is low and only silhouettes are visible. Therefore, the inside of the liner worn as the outside surface is capable of appearing black when in ambient light.

In regard to claim 5 and 13, Aldridge teaches a garment for protecting a firefighter as described above in this office action (see claim 1). The garment of Aldridge is capable of being used in the method of claims 5 and 13, since the structural limitations of the garment used in the method are provided by Aldridge and therefore it is capable of being used in the method as described.

However, Aldridge fails to teach the shell of low visibility displays camouflage.

At the time the invention was made, it would have been an obvious to a person of ordinary skill in the art to have provided the shell of low visibility displaying camouflage because Applicant has not disclosed that the shell of low visibility displaying camouflage

provides an advantage, is used for a particular purpose, or solves a stated problem.

One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the shell of low visibility being camouflage or any other color because as long as it appears dark or black in ambient light any color or pattern would comply and would have equivalent structure.

In regard to claims 7, 8, 15 and 16, Aldridge fails to teach the shells being similar in basis weights or equal in basis weights.

At the time the invention was made, it would have been an obvious to a person of ordinary skill in the art to have provided the shells being similar or equal in basis weights because Applicant has not disclosed that the shells being similar or equal in basis weights provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the shells being equal, similar or different in basis weights because as long as there is one shell of high visibility and one shell of low visibility the weight of each is structurally equivalent.

In regard to claim 9, Aldridge provides a coat garment (10) for protecting a military or paramilitary firefighter or emergency worker that comprises a shell that is capable of being reversed from a shell of high visibility (16) to a shell of low visibility (inside of 14). The garment is capable of being worn with either shell facing outwards while the other shell faces inwardly. The shell of high visibility (16) has portions that are reflective (30) and face outwardly when the protective garment is worn so that the shell of high visibility faces outwardly.

The garment of Aldridge is capable of being worn in a tactical situation in which a need for low visibility overrides a need for high visibility develops or is expected to develop. The military or paramilitary firefighter or emergency worker wearing the protective garment with the shell of high visibility facing outwardly may have an opportunity to doff the protective garment, to reverse the protective garment, and to redon the protective garment with the shell of low visibility facing outwardly and with the shell of high visibility facing inwardly.

In regard to claim 10, Aldridge teaches the shell of high visibility having reflective trim affixed thereto (30).

Response to Arguments

5. Applicant's arguments filed 08/27/05 have been fully considered but they are not persuasive.

I) Applicant argues that Aldridge (US 5,933,865) fails to teach reversing the jacket so that the inner layer is capable of facing outwardly.

Examiner disagrees since the liner 14 attached to outer shell 16 would not be taken apart or separated when reversed. The garment would just need to be reversed when the liner is attached to the outer garment. There is nothing that would prevent a wearer from reversing the jacket so that the shell of low visibility faces inward.

Reversing the jacket would not prevent the jacket from being incapable of being worn in the reverse mode.

II) Applicant argues that Aldridge fails to teach the shell of low visibility displaying camouflage.

Examiner notes that as long as the shell of low visibility has low visibility, the pattern of the shell is can be any as desired. As long as the shell has low visibility the pattern can be any as chosen by an artisan of ordinary skill in the art and based upon desired aesthetic effect.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alissa L. Hoey whose telephone number is (571) 272-4985. The examiner can normally be reached on M-F (8:00-5:30)Second Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Calvert can be reached on (571) 272-4983. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
